ACADEMIC DETAILS

Year	Degree/Exam	Institute
2024–2028	B.Tech in Computer Science & Engineering	Graphic Era Hill University, Dehradun
2024	12th, C.B.S.E	SKP Vidya Vihar
2022	10th, C.B.S.E	St. Francis School

EXPERIENCE

- **GeeksforGeeks – Campus Mantri** Jun 2026 – Present
 - Selected as Campus Mantri to represent GeeksforGeeks at Graphic Era Hill University.
 - Drive technical outreach, coding events, and learning initiatives across campus.
- **Infosys Springboard – Artificial Intelligence Virtual Internship** Jun 2026 – Present
 - Selected for Infosys Springboard Virtual Internship 7.0 (Batch 1).
 - Developing an AI-based Network Anomaly Detection & Threat Monitoring System using Machine Learning.

PROJECTS

- **Smart Resume Scorer** Java, Swing, MySQL, JDBC, Apache PDFBox
 - Developed a Java desktop application for automated resume parsing, candidate evaluation, skill matching, and ranking using MySQL and Apache PDFBox.
 - Implemented HashSet-based skill matching, Greedy scoring, $O(n \log n)$ candidate ranking, authentication, evaluation history, and PDF/CSV report generation.
- **Compiler** C, Flex, Bison, Clang, Compiler Design
 - Developed a C-Minus compiler in C, implementing lexical analysis and syntax parsing using Flex and Bison to process source programs based on formal grammar rules.
 - Designed core compiler components including Abstract Syntax Tree (AST) construction, semantic analysis, symbol table management, and type handling for program validation and analysis.
 - Implemented code generation to produce optimized IA-32 assembly output, with automated build configuration and test cases to support compilation, testing, and debugging.
- **Arena Master – League & Knockout Showdown** C++, Python, Flask, Qt, Data Structures
 - Developed a tournament management system supporting league and knockout formats for team registration, match scheduling, result tracking, standings, and tournament progression.
 - Implemented tournament logic using linked lists, trees, queues, stacks, graphs, and sorting algorithms, with Qt GUI and Flask-based web interface.
- **NetShield AI – Network Anomaly Detection & Threat Monitoring** Python, Machine Learning, Cybersecurity
 - Developed an AI-based network security system for detecting anomalous network activity and potential cybersecurity threats using Machine Learning.
 - Implemented network traffic analysis, anomaly detection, threat classification, and an interactive monitoring dashboard.

TECHNICAL SKILLS

- **Programming:** Java, C++, Python, C, JavaScript
- **Software Engineering:** Object-Oriented Programming (OOP), Software Development, Problem Solving
- **Data Structures & Algorithms:** Arrays, Linked Lists, Trees, Graphs, Sorting, Searching
- **Core CS:** DBMS, Operating Systems, Computer Networks, Computer System Security
- **Databases:** MySQL, SQL, JDBC
- **AI/ML:** Machine Learning, Anomaly Detection
- **Web & Backend:** HTML, CSS, Flask
- **Tools & Cloud:** Git, GitHub, Apache PDFBox, AWS

CERTIFICATIONS

- **Developing Generative Artificial Intelligence Solutions** — AWS — 2026 [Certificate]
- **Fundamentals of Machine Learning and Artificial Intelligence** — AWS — 2026 [Certificate]
- **AI Fundamentals** — Google, Coursera — 2026 [Certificate]
- **AWS Certified Developer – Associate** — Infosys Springboard — 2026 [Certificate]

SCHOLASTIC ACHIEVEMENTS

- Solved 150+ problems across LeetCode and GeeksforGeeks, strengthening Data Structures, Algorithms, and problem-solving skills.
- Academic Excellence Award (Class X) – 91.2%.
- Selected as GeeksforGeeks Campus Mantri at Graphic Era Hill University.
